

NOTICE TO RESIDENTS ROBERT STREET WEST PUMPING TEST 90-DAY PUMPING TEST TOWN OF PENETANGUISHENE

What to Expect:

A 90-day pumping test is planned at the Robert Street West Field – Well No. 2 located at 161 Robert Street West in the Town of Penetanguishene (see figure below). Testing is planned to commence in late August 2021. The testing is being conducted to update groundwater quality data for the well-field and is a follow up to a similar test in 2012.

The pumping test will be conducted under the existing Permit to Take Water for the Robert Street West Wellfield and with approval of the Department of Fisheries Ontario. The groundwater will be discharged through a diffuser and flow through an erosion control structure prior to discharge to Copeland Creek. Sampling of the discharge and of the creek downstream will be regularly completed to confirm that the water quality meets the regulated standards

Message:

Should you have any questions about the test please call Moe Lefaive at

705-549-7992 ext. 117

Alternatively, please contact. Bryan Murray at
