

## **The Corporation of The Town of Penetanguishene Committee of the Whole Report**

**COMMITTEE:** Transportation & Environmental Services Section

**COMMITTEE CHAIR:** Councillor George Vadeboncoeur

**SUBJECT:** Proposed 5 Year Stormwater Maintenance Plan

**REPORT:** RDS–2025-03

---

### **REPORT HIGHLIGHTS**

- Outline of proposed 5-year Stormwater Maintenance Plan (2025-2029);
- \$2,935,000 in total over the 5 year plan;
- Increased funding is required throughout the plan in order to increase the level of service provided and to minimize the reliance on high cost capital improvements

### **RECOMMENDATION**

THAT the proposed 5 Year Stormwater Preventative Maintenance Plan be received for information.

### **BACKGROUND**

To maintain the Town stormwater drainage system on an annual basis, certain drainage ditches, storm sewers and stormwater facilities are identified each year to undergo preventative maintenance and improvement.

This includes, but is not limited to, drainage ditch excavation, Stormwater facility excavation, catchbasin cleaning, asphalt drainage swales/gutters, storm sewer/culvert installation and flushing. Each of these measures helps to maintain, improve and extend the life of the stormwater drainage network as well as the road network.

### **ANALYSIS**

A listing of locations and the preventative drainage maintenance and improvements proposed for each, is outlined below. The locations and maintenance treatments proposed for each locations have been determined based on recurring drainage issues that have been identified by Roads Division staff and from drainage issues raised by residents.
